

Coaches,

Would you like to have the freedom to generate quizzes as you need them? Be able to mark those questions already used in a quiz and not repeat them until a later date?

Generate quizzes through specific range of verses (150-200 Jr quizzes or 250-300 Sr quizzes).

Generate a random list of verses for review, generate your own concordance (control the report: example, just 2-6 time words or every word regardless of number of times), an alpha list to know where quotation completion become unique, a horizontal list of all verses by verse number, a report showing all verses that contain a question, a report showing all verses that contain an exclamation mark, there are additional reports available in the software, you can print or save them to view on your PC.

The questions are written to emulate the National Jr and Sr questions seen at Extravagana's and National tournaments.

You can even try your hand at writing questions to be included in the database of questions or keep them separate or combine them at will. All this and more at your fingertips!

Go to the web site of Henry Budzinski, (coach with over 30 years of experience, a question writer for over 20 years and the WI District Jr Quiz Director since 2000) to retrieve an order form for 2017:
